STATEMENT OF ORIGINALITY

I declare truthfully that to the best of my knowledge, in this thesis there is no scientific work that another person has ever submitted to obtain an academic degree at a university. No work or opinion has ever been written or published by another person except those cited in this manuscript and mentioned in the Bibliography.

Suppose it turns out that this thesis manuscript can be proven to contain elements of plagiarism. I am willing to have this thesis disqualified and the academic degree I have obtained (bachelor) canceled and processed by laws and regulations (UU No. 20 of 2023, Article 25 paragraph 2 and Article 70).

ACKNOWLEDGEMENTS

All praise be to Allah SWT for His abundant grace, guidance, and blessings, enabling the author to complete this final project successfully. May peace and blessings always be upon Prophet Muhammad SAW, his family, his companions, and all Muslims. May we all be among those who receive his intercession on the Day of Judgement. Amiin.

This research, entitled "*Classification of Toddler Nutritional Status Using the Naïve Bayes Algorithm Based on Anthropometric Measurements*", has been prepared as a requirement for obtaining a bachelor's degree in the Informatics Engineering Programme, Faculty of Science and Technology, Universitas Darussalam Gontor. It is hoped that this study will provide benefits to all involved parties and offer new insights to its readers.

The completion of this dissertation would not have been possible without the support, guidance, and assistance of many individuals. Therefore, the author would like to express sincere gratitude to:

1. Allah SWT, for granting health and ease in completing this dissertation.
2. Al-Ustadz Prof. Dr. KH Hamid Fahmy Zarkasy, M.A.Ed., M.Phil, as the Rector of Universitas Darussalam Gontor.
3. Al-Ustadz Haris Setyaningrum, M.Sc, as the Dean of the Faculty of Science and Technology, Universitas Darussalam Gontor
4. Al-Ustadz Dihin Muriyatmoko, M.T., as the Head of the Informatics Engineering Programme.
5. Al-Ustadz Widya Kurniawan, M.Kom., and Al-Ustadz Dihin Muriyatmoko, M.T., as thesis supervisors, for their invaluable guidance, insights, and patience throughout the research process.
6. All staff at Puskesmas Jogorogo, for granting permission and facilitating the research.
7. All lecturers and staff, especially in the Informatics Engineering Programme, for their knowledge and assistance, which cannot all be mentioned individually.

8. The author's family, particularly beloved parents and younger sibling, for their endless prayers, support, love, motivation, and encouragement.
9. Fellow students of the Informatics Engineering Programme at Universitas Darussalam Gontor, especially the Class of 2021, and dear friends whose names cannot all be mentioned, for their support and moral encouragement during the completion of this dissertation.

The author acknowledges that this dissertation is not without shortcomings. Therefore, constructive criticism and suggestions for future improvements are highly welcomed. May this dissertation contribute meaningfully to the field and benefit those who require it.
